

WAX-CREAM FOR MANUAL APPLICATION 3663

Base : Aqueous emulsion of wax-binder.

Wax-Cream 3663 is a classic shoe cream that is applied by hand by means of a sponge or cloth.

After a short drying time of approx. 5 min. there has to be polished manually with cotton or with a wool-yarn-brush.

This wax-cream is suitable for smooth leathers in order to reach a smooth touch and nice gloss. There should be used a colour-tone similar to the one of the leather to freshen up the colour of the leather in a nice way.

Colour-tones can be adjusted if requested.

If, on the contrary, a purposeful anti-effect should be reached, it is possible to cream the leather with a darker colour-tone. Through this there can be reached a colour change.

The wax-cream should be applied evenly and slightly.

Technical Data

- Base : Aqueous emulsion of wax-binder.
- Density : 0.930 g/cm³
- Hazardous Classification: Hazardous to the environment.
- Flashpoint : None
- Storage : Frost-free.
