

## LEATHERFOIL - HARDENER 5556

**Application** : Harden of leather foils and cutting edges of leathersoles.

**Processing Instruction** : Paint leather foils with a brush and dry for half an hour before further processing. The leather foils will be grinded after drying, cleaned from the grinding dust and then the processing will continue, for example with a leather foil colour. The cutting edges of leather soles will be treated in the same manner after drying. **5556** is also suitable (same treatment) for hardening of Masonit – heels prior to colouring. Furthermore **5556** can also be used as a „ liquid toe cap“, for example with clogs.

**Technical Data** :

Base : PUR- and Synthetic resins.

Specific gravity : 0,842 g/cm<sup>3</sup>

Flashpoint : - 19°C

Hazardous classification : 3

Storage : Cool and dry.
