

## Wiping Colour for Rubber, EVA and TR 6143

**Base** : Polyurethanes and Synthetic Resins.

**Application** : Used to varnish rubber, EVA and TR- material.

**Processing** : Application by means of a roller or a brush.

The product from time to time has to be stirred very well prior and during processing in order to grant a constant colour shade.

In order to achieve a good adhesion, the rubber material that has to be varnished should be cleaned with Cleaner 430 and halogenated with Primer 862/10 prior to processing – with EVA material a pre-treatment with Primer 874 is recommended.

**Technical Data** :

- Base : Polyurethanes and Synthetic Resins.
- Density : approximately 0,900 g/cm<sup>3</sup>
- Hazardous Classification : 3
- Flashpoint : -17° C
- Storage : Dry storage room, not below 5°C.
- Storage life : When stored properly, at least ½ year.
