

CLEANER 951/10

This product is used for cleaning of PUR-soles before the application of adhesive, in case roughening is not possible. You have to work with cotton, free of fluff, and you have to take care that no residues of sole-material are on this cotton in order to avoid soiling of the parts that have to be cleaned. Therefore the cotton has to be changed frequently. By working with this product rubber-gloves and protective goggles should be worn.

Prior to application of this cleaner, please try it on an inconspicuous place so that you can see if the product might strongly affect the surface of the PUR-soles.

Technical Data	:	- Base	:	Organic solvents
		- Density	:	0,854 g/cm ³
		- Hazardous Classification	:	3
		- Flashpoint	:	- 17° C
		- Storage	:	Cool and dry.
		- Packing	:	12 L
