

## KECK-COLOURPASTE 9806

**Application** : The Colourpaste base 9806 is used to ink polyurethane adhesives.

**Processing** : KECK-Colourpaste 9806 has to be added to the adhesives in parts by weight of 1-1,5% prior to the application and has to be mixed very well . While processing the product should be stirred or shaken.

Afterwards the coloured adhesive can be processed as usually in one-component or two-component version with use of KECK hardeners.

After storage of the coloured adhesive for a longer period, it should be thoroughly mixed before further processing.
