

## **CONCENTRATED RELEASE AGENT WATER BASED EVA 6734**

The **KECK concentrated release agent EVA 6734** has been formulated in such a way that the consumer has only to add water in prescribed proportions.

It has to be mixed up before use to a ready to use release agent as following:

**Concentrated release agent EVA 6734** : 1 part by weight

**Water** : 100-125 parts by weight

The proportions of water to add may vary according to the material and type of soles used hence one should make trials with different mixing ratios before any industrial use in order to determine the best suited mixing.

Mix the release agent with water only shortly before use.

### **Technical Data** :

- Storage : dry and cool, protect against frost
