

CONCENTRATED EVA RELEASE AGENT WATER BASIS EVA 6735

The **KECK concentrated release agent EVA 6735** has been formulated in such a way that the consumer has only to add water in prescribed proportions.

It has to be mixed up before use to a ready to use release agent as following:

Conc. release agent EVA 6735: 1 part by weight

Water: 100-125 parts by weight

The proportions of water to add may vary according to the material and type of soles used hence one should make trials with different mixing ratios before any industrial use in order to determine the best suited mixing.

Mix the release agent with water only shortly before use.

Technical Data :

- Storage : dry and cool, protect against frost
